

REMARKS/ARGUMENTS

Claims 21-32 and 34-41 are active in this application, claim 33 having been cancelled by the present amendment. Claim 21 has been amended by incorporating the limitations of claim 33. No new matter has been added by these amendments.

Applicants wish to thank Examiner Nakarani for the indication of allowable subject matter in claim 33 of the present application. It is believed that upon entry of the present amendment, all claims will be in condition for allowance.

The claims stand rejected under 35 U.S.C. 112, first paragraph. This rejection has been obviated by the amendment of claim 21 to specify that the amorphous resin has a glass transition temperature in the range of 70-140°C. Accordingly, while Applicants reserve the right to pursue the broader original claim 21 in a continuation application, Applicants have amended claim 21 to include the range of glass transition temperature noted by the Examiner as enabled by the present application and allowable, in order to further this application towards allowance. Accordingly, the rejection should be withdrawn.

Applicants submit that the application is now in condition for allowance and early notification of such action is earnestly solicited.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
